

SmartHome Management System

EyStar SmartHome Management System

● 24-Hour Peace of Mind

Your home is more than an investment. It is a haven of comfort, peace and security. Yet, security of your home is always a major concern when you are away, especially for homes in mixed housing development.

Designed to provide superior security functions, **EyStar** is an innovative SmartHome Management System equipped with unrivalled features to enhance your quality living to safeguard your home 24 hours a day.

● Alert Autodial to 8 Designated Phone Numbers

EyStar SmartHome Management System can call up to 8 designated numbers to inform intrusion, the nature of the intrusion and the exact location of security breach in your home. This gives you real-time alert and the accurate information for next course of action.

● Direct Alert to Guardhouse

When an intrusion is detected, **EyStar** SmartHome Management System can be made to directly call the guardhouse of the housing development to inform the nature of security breach. This provides security initiatives for further investigation and effective action.

● Movement Detection

With **EyStar** SmartHome Management System, you can listen to the sound of unusual movement made by the intruders and detect their whereabouts in your home when you place the Smart Keypads and tracking devices at designated areas of your home.

● Interactive & Integrated Security System

The Smart Keypad allows you to give verbal warning such as shouting to surprise and frighten off intruders. **EyStar** SmartHome Management System can be integrated into your home lighting too. When intrusion is detected, it switches on lights at your home, one at a time or all at once, to scare off intruders. This gives you real-time response to prevent further losses.

● Ease and Comfort at your fingertips

Life is simply easier and comfortable when you have total control at your fingertips. With **EyStar** SmartHome Management System, you are at the forefront of today's ultimate lifestyle. From lights to air-conditioners, fans to coffee maker or curtains to front gate, you can have them operated via our Smart keypad, house phone, mobile phone, Portable Touch Screen or internet.

So, you can now have the comfort of coming home with everything controlled from afar and all readied to pamper you the moment you are at the doorstep.

With **EyStar** SmartHome Management System, it's not just a home. *It's a SmartHome.*

The Lifesaver

● Fire Alert

EyStar SmartHome Management System is more than a 24-hour security guard. It is a lifesaver in time of crisis. When fire occurs in wee hours, **EyStar** SmartHome Management System switches the lights to blinking mode to alert the occupants to vacate their house immediately. The blinking lights also serve as beaming guide as the occupants vacate their home for safety.

● Ensure safety of the elderly

EyStar SmartHome Management System can help ensure the safety of the elderly. It can be programmed to conduct a routine check on movement in the house. If no movement is detected, its Alert Autodial function dials the designated number to inform the situation. As the Smart Keypad is interactive, you can directly establish communication with the person.

In situation where an elderly person is left immobile, he or she can trigger a dial-out from a wireless panic device to inform a designated family member. Again, the two-way communication and listening-in feature will save the situation.

The Guardian

● Safeguard your young

EyStar SmartHome Management System can detect baby cry or monitor your maid via its listening-in feature. This helps to safeguard the safety of your little one or prevent any unscrupulous behavior of maid.

The Energy Saver

EyStar SmartHome Management System can be programmed to help you save energy. When you leave home, just arm the system. It will automatically switch off all designated electrical appliances. When power failure occurs, **EyStar** SmartHome Management System calls to inform you that the Security system is now running on back-up battery and you can choose to delay your return.

The Digital Answering Machine

EyStar SmartHome Management System is a smart digital answering machine. It allows callers to leave message for up to 8 different individuals. After a certain preset number of rings, the System answers the call and asks the caller to leave a message. For example: "If you wish to speak to John Smith, please press 1, press 2 for Pat Smith, press 3 for Ian Smith".

After the caller leaves a message in the individual voicemail, **EyStar** SmartHome Management System calls the particular receiver to inform him to retrieve his message.

Upgradeable for more smarthome advantages

EyStar SmartHome Management System is upgradeable to give you more complete smart home features. These include:
